- Progressive Enhancement
- Mobile First
- Universal Design
Responsive Web Design Resources

Google Developers Web Fundamentals
“Responsive web design, originally defined by Ethan Marcotte in A List Apart responds to the needs of the users and the devices they’re using. The layout changes based on the size and capabilities of the device. For example, on a phone, users would see content shown in a single column view; a tablet might show the same content in two columns.”

RWD Panel Discussion Questions

● What motivated you to try RWD?
● How did you get organizational buy-in for RWD?
● What site(s) are you using it for?
● What surprises, good and bad, have you run into with RWD?
● How has moving to RWD affected your testing and QA?
Thanks!
